

# Alex Developer

## Senior Backend Engineer

alex.developer@email.com · github.com/alexdev · linkedin.com/in/alexdev · Remote / Worldwide

### SUMMARY

Backend engineer with 4+ years of experience building scalable APIs and distributed systems. Passionate about developer tooling, data-intensive applications, and remote-first teams. Strong background in Node.js, TypeScript, and PostgreSQL. Experienced with cloud infrastructure on AWS and container orchestration with Docker. Open to senior and staff-level remote roles.

### EXPERIENCE

#### Senior Backend Engineer

Cloudify Labs — Remote · Jan 2023 – Present

- Designed and shipped a multi-tenant REST API serving 2M+ requests/day using Node.js and TypeScript.
- Reduced average query latency by 60% through PostgreSQL indexing and query plan optimisation.
- Led migration from monolith to microservices, containerised with Docker and deployed on AWS ECS.
- Mentored 3 junior engineers; introduced TDD practices that reduced production bugs by 40%.
- Implemented CI/CD pipelines with GitHub Actions; achieved 99.8% deployment success rate.

#### Backend Engineer

DataStream Inc — Remote · Mar 2021 – Dec 2022

- Built a real-time data ingestion pipeline processing 500K events/hour using Node.js and Redis Streams.
- Developed GraphQL API consumed by 3 internal frontend teams, reducing over-fetching by 35%.
- Managed PostgreSQL schema design and wrote migration scripts for zero-downtime deployments.
- Integrated AWS S3 and Lambda for async document processing workflows.

#### Junior Backend Developer

TechStart Agency — São Paulo, Brazil · Jun 2019 – Feb 2021

- Developed RESTful APIs for 5 client projects using Node.js and Express.
- Worked with MySQL and MongoDB databases; wrote automated tests with Jest.
- Deployed applications to Heroku and later migrated to AWS EC2.

### SKILLS

|                |                                                              |
|----------------|--------------------------------------------------------------|
| Languages      | TypeScript · JavaScript · Python · Go (learning)             |
| Frameworks     | Node.js · Express.js · NestJS · FastAPI                      |
| Databases      | PostgreSQL · Redis · MongoDB · MySQL                         |
| Cloud & DevOps | AWS (EC2, S3, Lambda, ECS) · Docker · GitHub Actions · CI/CD |
| Tools          | Git · Linux · REST APIs · GraphQL · Prisma ORM               |
| Methodology    | Agile · Scrum · TDD · System Design · Code Review            |

### EDUCATION

#### B.Sc. Computer Science

University of São Paulo — 2015 – 2019

### PROJECTS

---

**InteliCareer (this platform)**

Full-stack career intelligence dashboard built with Next.js, Node.js, and PostgreSQL. Features job application tracking, skill gap analysis, and market trend visualisation.

**OpenQueue**

Open-source job queue library for Node.js backed by Redis. 800+ GitHub stars. Supports delayed jobs, retry logic, and priority queues.

**PgWatch**

PostgreSQL slow query monitor with Slack alerts. Built with Go and deployed as a single binary.

**LANGUAGES & AVAILABILITY**

---

English (Fluent) · Portuguese (Native) · Spanish (Basic)

Available for remote full-time roles. Open to US, EU, and international teams.
